

## Evaluation of the Area around Jambur and Pulkhana in NE Iraq

A report on the petroleum geology of the area around Jambur and Pulkhana. Interpretation based upon detailed synthesis of published work.

The report provides an overview of the area incorporating Pulkhana, Jambur, Shakal, Kor Mor, Qumar, Sarqala and Gilabat fields that will be useful for explorationists and in addition, comprehensively presents publicly available data on fields and discoveries for purposes of field evaluation.
